

## PMS (Petrol) Product Sheet

Downstream supply with delivered logistics and audit-ready documentation

### Overview

PMS (Premium Motor Spirit) is a light petroleum product used primarily as fuel for spark-ignition engines. Superior Link supplies PMS through structured transactions, with delivered pricing available by corridor and controlled haulage under QHSE-led operations.

### Typical quality/spec highlights (indicative)

Parameter	Typical reference	Notes
Research Octane Number (RON)	>= 91-95	Depends on supply source and grade; confirm on COQ/COA.
Sulfur	low ppm range	Exact sulfur varies by regulation/supply; verified per certificate.
Density @ 15°C	typical gasoline range	Reported on quality certificate.
Appearance	clear & bright	Visual clarity checks at loading/discharge.
Standards	ASTM D4814 / EN 228	Equivalent/recognized gasoline specs (as applicable).

*All values are indicative. Final specification is confirmed by the Certificate of Quality/Analysis issued for the supplied batch.*

### Applications (Best for)

- Independent and major marketers
- High-throughput fuel stations
- Depot-linked resellers and regional distributors

### Ordering & offer formats

- Spot supply: same-day quotes with clear validity windows and loading/delivery schedule.
- Weekly contracts: weekly reset structure with minimum weekly volumes and agreed corridors.
- Delivered pricing: landed cost includes product + haulage + documentation support.
- Payment terms: cash/advance for new customers; structured terms may be considered for repeat buyers subject to approval.

### Documentation & compliance

- KYC and counterparty verification for each transaction.
- Deal sheet / order confirmation, loading ticket, waybill, and signed proof-of-delivery (POD).
- Journey management: route plans, dispatch controls, and incident escalation procedure.
- Claims and discrepancy workflow supported by audit-ready records.
