

Investor Teaser

1–2 page summary for partners and investors

Company snapshot

Superior Link Nigeria Limited is an indigenous oil & gas logistics and trading company. We operate a structured downstream model focused on trading and haulage for PMS, AGO (Diesel), Jet A1 and CNG, with audit-ready documentation and QHSE-led logistics execution.

What we do

- Trading: PMS, AGO, Jet A1 and CNG supply programs (spot and contract formats).
- Haulage & logistics: disciplined dispatch, journey management and proof-of-delivery (POD).
- Compliance-led operations: KYC and recordkeeping designed for bankable transactions.

Why now

- Large and growing domestic demand for reliable downstream supply and logistics.
- Opportunity to scale corridor coverage (Lagos/Ogun, Abuja/North Central, South East) with a repeatable operating model.
- Investor appetite for compliant, documentation-driven trading platforms with strong execution.

Target customers

- Marketers and high-throughput retail stations (PMS).
- Industrial plants, construction, logistics parks and fleets (AGO).
- Aviation marketers and approved supply chains (Jet A1; NDA-based sharing where required).
- CNG stations and fleet conversion programs (partnership/offtake planning).

Partnership / investment opportunities

- Working capital lines to support inventory cycles and contract fulfillment.
- Fleet/asset finance partnerships to scale haulage capacity with controlled subcontractor programs.
- Strategic partnerships for export corridor structuring and international customer acquisition.
- Equity/structured debt for expansion of trading volumes and logistics footprint.

Investor Teaser (continued)

Operational controls and next steps

Operating model & controls

- Validity-window pricing and structured deal sheets for each transaction.
- Documentation on every delivery: loading ticket, waybill, and signed POD.
- QHSE-led journey management, incident escalation and claims workflow.
- Counterparty KYC and controlled terms to reduce credit and compliance risk.

Use of funds (example)

- Inventory cycle support (spot/contract fulfillment).
- Logistics scale (fleet expansion, subcontractor controls, route coverage).
- Business development (enterprise customers, aviation channels, export structuring).
- Systems (documentation workflows, reporting, and compliance readiness).

Next steps

- Share target product(s), corridor(s), and expected monthly volumes.
- Agree commercial structure (spot/weekly/standing supply) and documentation requirements.
- Schedule an investor/partner call for timelines, terms and deployment plan.
